

SHORELINE SURVEYS LIMITED - SIDE SCAN SONAR EXTRACT

Operator: Emile Foote

Date: 15.07.10

Client: AXIS

Job #: J500

Location: Holyhead Harbour

Name: Extract 01

Record details: 325 kHz, 25m range, 3.0m tow-fish altitude, 1.5 km/h

Date: 13.01.10

Notes: It is possible to see that the seabed is littered with small fragments of rock/ natural features. Ten of these have been highlighted below (within red circles). There are many more (over one hundred) present even within this 30 second data extract (50 metres of data collection).
