PRN E002547 **NAME** Hensol Park, Mid Glamorgan WB **NGR** ST0476878099 **COMMUNITY** Pendoylan
TYPE WATCHING BRIEF **YEAR** 2001 **ORGANISATION** Glamorgan-Gwent Archaeological Trust
(GGAT) **PERSON** -

SUMMARY The Glamorgan-Gwent Archaeological Trust was commissioned to undertake a watching brief at Hensol Park during the construction of a covered training facility. Some recent drainage features were recorded along with some later post-medieval ceramics and a prehistoric flint waste flake (Sell 2001).

DESCRIPTION The Glamorgan-Gwent Archaeological Trust was commissioned to undertake a watching brief at Hensol Park during the construction of a covered training facility. There was some evidence of levelling consisting of modern deposits. The only features uncovered were a number of stony linear cuts that are likely to represent the physical remains of a fairly modern drainage system. Another linear cut, aligned north-south, could show the remnants of a king furrow or perhaps a recent depression cause by heavy plant (Sell 2001).

COMMENTS None

ARTEFACTS

TYPE: fragment **MATERIAL:** flint **PERIOD:** Prehistoric **DESCRIPTION:** One very small fragment of flint, almost certainly a waste flake. Broken and fire damaged. It represents evidence for flint working in the area as many important flint working sites are known in the Vale of Glamorgan (Sell 2001).

TYPE DESK BASED ASSESSMENT **YEAR** 2000 **ORGANISATION** Glamorgan-Gwent Archaeological Trust
(GGAT) **PERSON** -

SUMMARY GGAT were commissioned by Chapman Warren to conduct a desk based assessment for the site of the proposed extension to the Vale of Glamorgan Golf Club. The site is situated on land once owned by the former estate of Hensol Castle. 67 sites of archaeological interest were identified within the study area. Five are located within the development area. All five require further archaeological evaluation to fully assess the nature, extent and

value of the sites. Further archaeological evaluation is therefore needed to fully assess the potential effect the development may have on both known and unknown archaeological features (Mackintosh 2000).

TYPE Watching Brief **YEAR** 2009 **ORGANISATION** Glamorgan-Gwent Archaeological Trust
(GGAT) **PERSON** -

SUMMARY The Glamorgan Gwent Archaeological Trust (projects division) were commissioned by Leekes limited to undertake an archaeological watching brief, to observe groundworks associated with the construction of National Training facilities.

DESCRIPTION The Glamorgan Gwent Archaeological Trust (projects division) were commissioned by Leekes limited to undertake an archaeological watching brief, to observe groundworks associated with the construction of National Training facilities. The facilities include a two-storey sports pavilion, five pitches and a running track on land at the Vale of Glamorgan Hotel, Golf and Leisure Club, Hensol, Vale of Glamorgan. Two areas of mechanical excavation were observed during which the turf and topsoil was removed. A number of drainage features relating to the infrastructure of the park were present and were adversely affected by the groundworks for the current development. These included three stone drains and a rectangular, brick-built structure. A single worked flint scraper was recovered. No further archaeological features or finds were recorded.

SUMMARY A field visit undertaken as part of the Cadw funded project assessing Mills and Water Power in Glamorgan and Gwent.

DESCRIPTION A field visit undertaken as part of the Cadw funded project assessing Mills and Water Power in Glamorgan and Gwent. Site is in use and building is very well kept. The form of the building appears to have changed from the 1st ed but it is unclear as to how much of the original building or features actually remain (Bowden and Roberts 2012).
